# **Disclaimer**

This document is only used to convey the information. The participants in the buying please carefully read the white paper and the official website of the relevant instructions, and comprehensively understand the blockchain as well as digital assets. Please notice the potential risks, and fully assess your risk tolerance and actual Situation to make rational decisions.

The information contained in this whitepaper is for general understanding purposes only. This whitepaper is for discussion and presentation purposes only. The proposed blockchain platform “David Coin” does not guarantee the accuracy of the conclusions reached in this whitepaper.

Nothing in this White Paper shall be deemed to constitute a prospectus of any sort or a solicitation for investment, nor does it in any way pertain to an offering or a solicitation of an offer to buy any securities in any jurisdiction. This document is not composed by and is not subject to, laws or regulations of any jurisdiction, which are designed to protect investors.

# Abstract

Unfortunately, "charity-washing," which is comparable to "greenwashing," is becoming all too common, in which a firm makes a show of doing good but then reduces its positive impact through lack of transparency or actions that undercut the cause they advocate. The same may be said of "charity tokens," a new phenomenon in the cryptocurrency field popularised by the Binance Smart Chain.

Unfortunately, many of them turn out to be outright scams or "rug pulls," with no systems in place in their smart contracts to track the social impact they claim to be having. They are also frequently lacking in financial transparency, and their creators are generally unknown.

Then there are the various cryptocurrency trading frauds that benefit from the funds raised through initial coin offerings (ICOs) while failing to deliver on their promises. Furthermore, they occasionally draw enough individuals to the token they are propping up to create an opportunity to dump it on them, deflating the fictitious volume.

Unfortunately, many of them turn out to be outright scams or "rug pulls," with no systems in place in their smart contracts to track the social impact they claim to be having. They are also frequently lacking in financial transparency, and their creators are generally unknown.

Then there are the various cryptocurrency trading frauds that benefit from the funds raised through initial coin offerings (ICOs) while failing to deliver on their promises. Furthermore, they occasionally draw enough individuals to the token they are propping up to create an opportunity to dump it on them, deflating the fictitious volume.

# Our Mission

---

In Africa and Brazil, we seek to alleviate hunger and offer meals to people who go to bed hungry. We're here to serve as a link between those who want to collaborate transparently and effectively that ensure their donations reach thousands of people who don't have access to food.

Our purpose is to put a plate of food on the table of people who are hungry to finance the Kingdom of God. It's a charity token to assist as many poor Africa and Brazil as possible. They accomplish this by feeding them, giving them water, and educating them, teaching them essential skills that will enable them to return to work and earn a wage to live a better life.

## HOW DOES IT WORK?

---

The world of cryptocurrency is expanding day by day and it's going to be one of the largest networks of the world in the upcoming era. So, we are planning to use cryptocurrency (David Coin) to acquire and transparently distribute donations to those who fight hunger every day in Africa and Brazil.

# Why crypto?

---

Do you know that shortly at least 30% of world transactions will be done on blockchain currency? When we are planning to do charity crypto is the best option based on its following explicit features:

## Features

---

### Easy Transaction

It is fast, clear, and easy to make crypto transactions than using other traditional approaches.

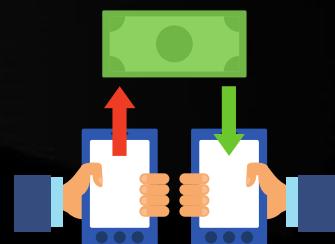

### Strong security

Transactions in cryptocurrency are irreversible which means the charities will reach their right destinations.

### Low Transaction Fee

Crypto transactions are much easier and cheaper to do.

# **WORLD HUNGER**

---

There is no reason why people should go to bed hungry in a world with enough food to sustain twice the population; but, according to the World Health Organization (WHO), more than one billion people live in poverty. Hunger-related micronutrient deficiencies render people more vulnerable to infectious diseases, hinder physical and mental development, lower work productivity, and raise the risk of premature mortality.

World hunger is a direct effect of greed and selfishness causing the world's food supply to be unequally divided. The expansion of factory farming of cattle is the most harmful manifestation of greed. Crops must now be grown on vast areas of land to feed the billions of animals farmed for food each year.

Over 35 percent of all grain produced in the world is fed to animals rather than humans to meet the expanding need for animal agriculture. David Coin has decided to begin his journey in Africa and Brazil. Thousands of men, women, and children perish in Africa and Brazil due to a lack of food and other necessities.

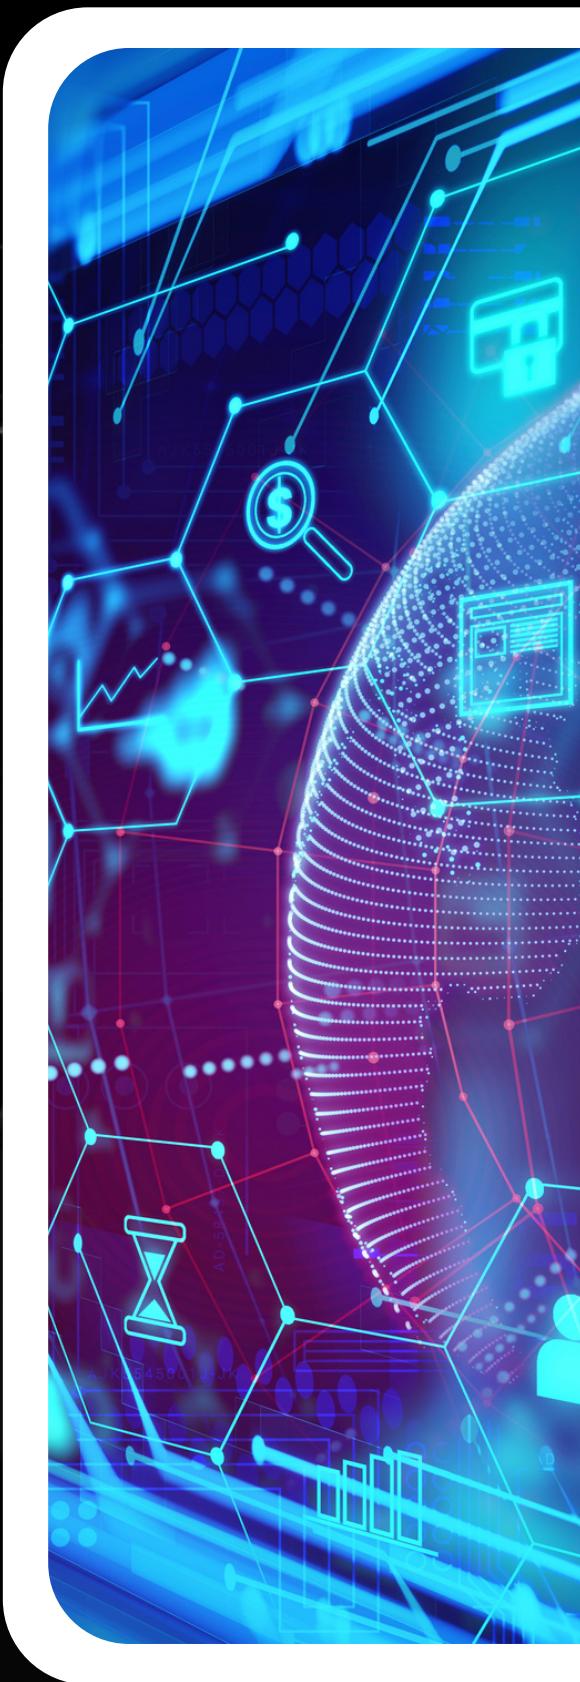

# Binance Smart Chain

The Binance Smart Chain uses a dual-chain design to empower users by allowing them to create digital assets and decentralized apps on a single blockchain. People can benefit from speedy trade and exchange here. From a programmability aspect, Binance Smart Chain intends to boost flexibility. The platform's goal is to make it easier for developers to create decentralized apps and for consumers to manage their digital assets cross-chain with low latency and high capacity.

Our ideals at David are mirrored in our initiative; the charity has been a significant component since the project's conception. Our charitable efforts have been designed to combat poverty and homelessness among young children around the world. David is motivated by causes that transcend beyond bitcoin, cryptocurrencies such as addressing issues of poverty and food insecurity in impoverished countries.

We want to stand out from the swarm of charitable groups since giving isn't simply a by-line for us; it's one of our key goals to help hungry people become socially independent. We chose hungry folks because they are the people who will be the future of future generations, and they deserve more. These social partnerships will enable homeless and poor people to grow, develop, and improve their situations, allowing them to live a more independent and successful life.

# Technology Behind David Coin

---

Blockchain is a distributed, unchangeable ledger that makes recording transactions and managing assets in a corporate network much easier. A tangible asset (a house, car, cash, or land) can be intangible (intellectual property, patents, copyrights, branding). On a blockchain network, virtually anything of value may be recorded and traded, lowering risk and cutting costs for all parties involved.

The lifeblood of any firm is information. The more quickly and precisely it is received, the better. Blockchain is ideal for delivering that information because it provides immediate, shareable, and completely transparent data stored on an immutable ledger that can only be read by permissioned network members. A blockchain network can be used to track orders, payments, accounts, production, and much more. Because members share a single view of the truth, you can see all facts of a transaction from beginning to end, giving you more confidence as well as new efficiencies and opportunities.

Duplicate record keeping and third-party validations waste a lot of time in operations. Fraud and cyberattacks can make record-keeping systems susceptible. Data verification might be slowed by a lack of openness. And, with the advent of the Internet of Things, transaction volumes have skyrocketed. All of this slows business and depletes the bottom line, indicating that we need to find a better solution. Then there's the blockchain. David Coin will use this technology to provide the safest and dependable platform for those in need.

# Market Landscape

---

A cryptocurrency, roughly defined, is a form of currency that resides on a distributed and decentralized ledger and is represented by tokens or "coins." Given the unregulated nature of bitcoin and developing digital assets, investors must be supplied with transparency and honesty. With some coins, there is a possibility of 'pump and dump' coins, as well as other frauds designed to extract money from investors.

These hazards may cause you to doubt the reliability and safety of bitcoin; however, David Coin has confidently provided solutions to these issues. After our partners have invested, we will continue to provide help through our analytics function, which provides in-depth information that can be used by the partner for budgeting and ensuring they are happy with their use of their crypto. Additionally, we will send regular reports on their expenditures to our valued partners to provide them with visibility and transparency.

# Tokenomics

---

Token Name:

David coin

Specification:

BEP20

Fee:

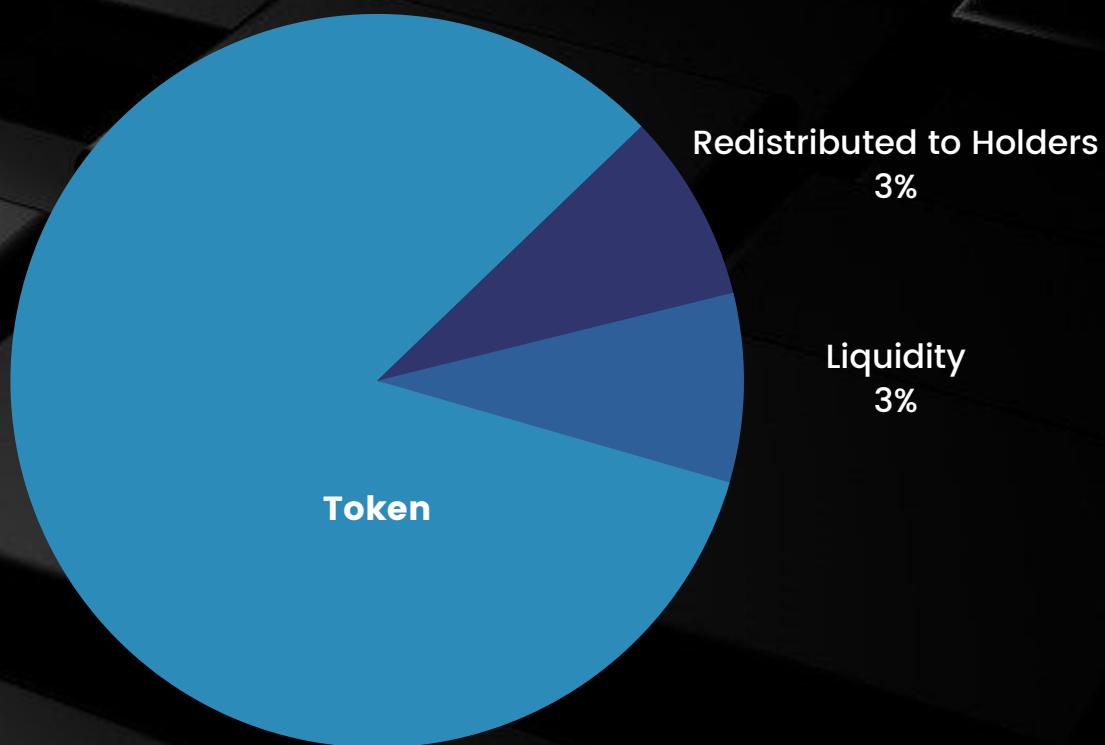

6%

Redistributed to Holders:

3% **Redistributed to holders**

Liquidity:

3% goes to liquidity automatically

# Road Map

## Phase 1

- Smart Contract Creation
- Marketing Plan
- Website Creation
- Community Build

- Pre Sale via dxsale
- Pancakeswap listing

2

## Phase 2

## Phase 3

- Aggressive marketing
- Coinsniper and Poocoin Ads
- Twitter influencers
- Reddit posts
- Youtube
- Tiktok Videos

- Coingecko and CoinMarketCap listing

3

## Phase 4

## Phase 5

- Team expansion
- Smart Contract Audit
- Trust Wallet Application
- CEX Applications

6

## Phase 6

# Conclusion

---

At the commercial level, the financial framework based on digital currency is similar to traditional banking, but it differs in nature and organization. New financial enterprises based on digital currency will develop as the proportion of digital money in the economy grows.

With the expansion of the global village concept, the world of digital assets is gaining appeal among the general public, allowing users to gain more profit while maintaining further privacy and protection. One of the most well-known digital assets is crypto tokens.

David Coin is a new type of cryptocurrency token that pays you to keep it. David Coin is one of the most secure and safe cryptocurrency platforms.
